

UNIK CONNECTION BOX

FULLY INTEGRATED AND EASIER
TO INSTALL AND MANIPULATE

UNIK CONNECTION BOX

Following the integrative advantage of the recently launched Skimmer UNIK, AstralPool has designed a new model of connection boxes that not only can be customized to achieve full integration with the pool floor, but also features enhanced installation and access.

FULL INTEGRATION

Cover designed to be integrated into the pool surroundings. Can be customized by inserting a tile or slab in the same material as the exterior of the pool to fully integrate with the pool's aesthetic.

VERSATILE INSTALLATION

Compatible to install in a Ø50 tube or hose, unlike other models that only offer one type of accessory.

EASY MAINTENANCE

Improved connection handlings, the connection system is M-25 on the inside, which allows you to manipulate after installation, without damaging the box or the pool.

You can choose the color of the outer frame from four available options: white, beige, light gray and anthracite. This creates a more harmonious and elegant-looking pool with a flawless aesthetic.

PRODUCT FEATURES

	White	Beige	Light Gray	Anthracite
Code	75971	75971CL090	75971CL129	75971CL144
